

A logistics chain can only work if all individual links fit together reliably. In order to ensure this reliability, we place great value on the highest quality of the individual components in the construction, manufacture and assembly of our Cargolifts. This is the foundation for our extensive warranty.

24-month warranty for parts and working time of Cargolift

In order to grant this warranty, the annual inspection of your Cargolift has to be carried out by a Bär Cargolift service partner. Our qualified service partners will repair any potential damages quickly and reliably. They will process the warranty claim directly with our partner company Besko AS in Denmark. A list showing the service partners and Besko subsidiaries in your region is available on our Bär Cargolift website.

24-month warranty for Bär original spare parts

We grant a 24-month warranty for Bär original spare parts beginning from the date shown on the delivery note.

Warranty claim

The warranty procedure will be carried out by our partner company Besko AS in Denmark on basis of our „Accepted repair time for warranty works“. Please return your defective spare parts and hand in your warranty claims directly to Besko.
